## Goal:

- Obtain a full time software engineering/development position.

## Academia:

- Informatics, Software Engineering B.S. — UC Irvine, Spring 2016
  - Computer Science: Data Structures, Algorithms, Databases
  - Informatics: UI/UX, HCI, Visualization, Prototyping, User Stories, UI Testing
  - Software: Development, Architecture, Design, Testing, Iteration, Agile, Integration

## Development Skills & Tools:

- Java, JavaScript, jQuery, dojo, AJAX, HTML/CSS, MySQL|OQL, a11y, Sass, C++
- Eclipse|J2EE, Chrome|FF, Git, VMs, UNIX, Heroku, Google Analytics, Chrome Extensions

## Work:

### Software Engineer, IBM Cloud — *July 2016-Current*

- Configuring device networks, managing data collection, querying device topologies, GUI analytics

### Student Software Engineer, UCI Informatics — *Winter 2015-16*

- Querying Google Books API and stored professors preferences through custom login portal
- Designing unique web-UI layout with PHP-integrated forms in WordPress

### Software Engineer Co-op, IBM IoT — *Summer 2015*

- Building custom server-side CSS preprocessor for Sass to efficiently support and display SVG's
- Implementing multiple front-end and server-side web-admin features for IBM Jazz
- Enhancing a multitude of dojo widgets to be context-aware based on user configuration
- Developing for an enterprise-level code base with server builds, within an Agile environment

### Student Software Developer, United Way — *Spring 2015*

- Implementing national tax-service scheduling system using JS, jQuery, AJAX, and PHP
- Demoing product iterations bi-weekly, and the final product to senior management

## Just For Fun:

### LastQuake.herokuapp.com

- Building asynchronous web tools using USGS and Google Maps API

### ArabicTypist.com

- Built a system-level Windows & macOS Keyboard, Chrome Web-Extension, and Web Text Editor
